When China Rules the World

by Martin Jacques

Read by Scott Peterson

Martin Jacques reveals how China will seek to shape the world in its own image.

According to even the most conservative estimates, China will overtake the United States as the world's largest economy by 2027 and will ascend to the position of world economic leader by 2050. But the full repercussions of China's ascendancy—for itself and the rest of the globe—have been surprisingly little explained or understood. In this far-reaching and original investigation, Martin Jacques offers provocative answers to some of the most pressing questions about China's growing place on the world stage. This is the first book to fully conceive of and explain the upheaval that China's ascendance will cause and the realigned global power structure it will create.

AUTHOR

Martin Jacques, a political journalist and scholar, is the co-editor and coauthor of *The Forward March or Labour Halted?*, *The Politics of Thatcherism*, and *New Times*. He lives in London.
